

July Coronation 2006 Emergency Plan

Medical Emergencies

In the event of a medical emergency, North Kitsap Fire and Rescue will be notified. They have a fire station located within 5 miles of the site. If the situation is not life threatening the Autocrat and/or Baronial Seneschal should be notified prior to calling 911. If 911 is to be called, the following address will be given for the event:

4311 NE Hwy 104. Port Gamble.

This is the address for the Port Gamble Trading Company. Then directions will be given to the location of the injury. i.e. top of the hill, Bowl between the houses, the ball field or behind the trading post. The Gatekeeper will be notified and along with the Constables and Autocrat team will be responsible for clearing roads and creating access and guiding the aid car to the area where it is needed.

It is imperative that a member of the Constabulary or Autocrat team notes the modern name of the person receiving treatment.

In the event that an airlift is deemed necessary by NKFR, the closest school is Wolfle Elementary located on Bond Road. This site is again within 5 miles of the site.

Police Emergencies

The responding authorities for this site are the Kitsap County Sheriff's Office. They can be reached by 911. Once again the reporting address of the incident should be:

4311 NE Hwy 104. Port Gamble.

Then directions will be given to the location of the injury. i.e. top of the hill, Bowl between the houses, the ball field or behind the trading post. The Gatekeeper will be notified and along with the Constables and Autocrat team will be responsible for clearing roads and creating access and guiding the aid car to the area where it is needed. **In any situation, other than life threatening, the Autocrat along with the Baronial Seneschal and acting Kingdom Seneschal will make the determination whether to call the authorities.**

Evacuation Plan

In the unlikely event that the site in Port Gamble should need to be evacuated, Hwy 104 will be utilized. This Highway is a two-lane road that runs both to Kingston and Towards the Hood Canal Bridge. There is direct access to this road from the camping areas on both sides of the road. The more challenging aspect would be helping the participants remove their cars from the parking lot in an orderly manner. This would be accomplished by a combination of the autocrat team, the gatekeeper and the constables, communicating with radios and directing traffic from the mill site over the hill and to the camping areas, or in extreme emergency, to the Hwy for immediate evacuation.
